

Appl. No. 10/726,201
Response Dated November 23, 2005
Reply to Office action dated September 2, 2005

Amendments to the Specification

Please replace the paragraph beginning at line 6 on page 23 with the following amended paragraph:

Figure 7C is a pictorial view showing display panel 140 after "Monday" has been selected using the up/down buttons 154, and after button 160 has been pressed. As shown in Figure 7C, for example, the controller 136 can be configured to display the event time parameter 162 and heat/cool set point parameter 164 for each individual period in the schedule. In Figure 7C, for example, the various schedule parameters for each period can displayed on the display panel 140 by repeatedly pressing the up/down buttons 154 on the keypad 142 (see Figure 6), causing the controller 136 to scroll through each individual period on the display panel 140. When the user is finished viewing the schedule parameters for that particular day, the user may either press button 156 to go back to the previous screen (see Figure 7B), or button 160 to go back to the main screen 144 (see Figure 7A).
